6 Tips To Tidy Up Your Cleaning Stash

(And Keep Your Supplies Ready)

1. Get a supply cart

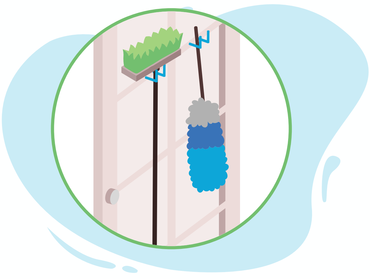
Don't think about the silliness of pushing your cart up and down. You'll conquer your weekend chores with unmatched efficiency!

2. Sort supplies into bins

Gone are the days when you carelessly threw your cleaning supplies into your cleaning stash. Identify your bins to save time!

3. Pick a storage spot

Stop running around your home picking up your tools and products. A single spot for all your cleaning supplies is the best idea!



4. Use vertical space on doors

Take advantage of that unused space in your cleaning stash with hooks and broom holders. Double the space, double the benefits!

5. Hang supplies on tension rods

You can use a couple of tension rods to store your cleaning supplies creatively and free up space on your shelves.

6. Rearrange for easy access

Stop wasting time going through all your products to find what you need. Save those spots with easier access for your most used supplies.
